ANGLE GAME DIY INSTRUCTIONS

AKA BETTER TO PRINT IN A PRINT SHOP :P

What you will need

- A3/A4 Colour printer
- A4 paper sheets
- A3 paper sheets
- Scissors or cutter
- Glue
- 4 Pawns (or you can replace them with small objects you find at home)
- 1 hourglass (or any kind of timer, you can even use your smartphone).

Producing the **ANGLE** game at home is easy, but you will need some time to cut the card sets and construct the dice.

The components (except the board) are designed to be printed on an A4 colour printer. For the board you will need an A3 colour printer (use file n.02b) or a plotter (use file 02a), if you don't like the puzzle effect.

You may be able to do this at home. If you are unfamiliar with printer settings, especially double-sided printing, it is best to contact a print shop :)

If you want better quality, you can consider the suggested paper weight.

TIP! The game quizzes have two levels of difficulty, basic and intermediate.

You can find out more by reading the game rules. If you only intend to use the basic level, you can skip files no. 13, 14, 15 and 16. If you only intend to use the intermediate level, you can skip files no. 9, 10, 11 and 12.

How to set your printer for double-sided printing

Scaling: Fit to page
Orientation: Landscape (horizontal)

Start to play

Once you have finished printing and cutting all the components, place it as described in the game rules and start playing!

Enjoy!

PDF file number	Content	Size	n. of pages	Colour	Paper weight	Printing info
1	Rules	A4	4	Colour	100 g	Double-sided printing
02a	Board (unique)	6,2 x 6,2cm	1	Colour	400 g	One side printing
