

MaFiRM 2020/21

IT FOR FINANCIAL INSTITUTIONS I – II

Domenico Fileppo – Intesa Sanpaolo

Course objectives

Digital Strategy is heavily influencing the world of banking and **Data Strategy** is essential to achieve an effective level of digitization.

In this context, current bank risk management systems must evolve by leveraging on **innovative technologies** as well as, of course, satisfy **new regulatory requirements**. The “RegTech” approach applied to Risk Management becomes crucial.

This evolution also embraces traditional skills of risk management people who must evolve towards hybrid figures: the "**Digital Risk Managers**".

Topics

Digital Transformation, Data Strategy, IT Risk Management Framework and Drivers of Risk Management Architecture Evolution.

IT Organization.

IT Innovation with focus on technology trend that are shaping the Digital Bank of future.
